

Pick up and walking information.

Students and families. There have been a number of safety concerns with students walking through or meeting parents in the new neighborhood currently under construction behind the school. After meeting with a city engineer, we hope we can provide some guidance to a safe route home.

Currently there are no complete sidewalks along 21st place (the new street). This is an area of active construction. Many students walk home using this route and due to the congestion, it is best for drivers to avoid this area. The red arrows indicate the safest walking routes home. All students should do their best to stick to the completed areas of sidewalk or as far to the side of the road as possible. The new roads (17th and 21st) should not be used for drop-off or pick up.

Thanks for helping us keep everyone safe
